Our Mission

SOLES changes lives by empowering the Hispanic community to realize its fullest potential and to impact the world through STEM awareness, access, support, and development.

Our Vision

SOLES' vision is a world where Hispanics are highly valued and influential as the leading innovators, scientists, mathematicians, and engineers.

Our Organizational Pillars

Our chapter is built upon four pillars that guide our mission. We ensure members thrive through **Academic Excellence** and prepare them for industry through **Professional Development**. We inspire the next generation with dedicated **Community Outreach** and create a supportive familia through **Recruitment and Retention**. This structure allows us to provide a holistic and impactful experience for every member.

Awards & Recognition

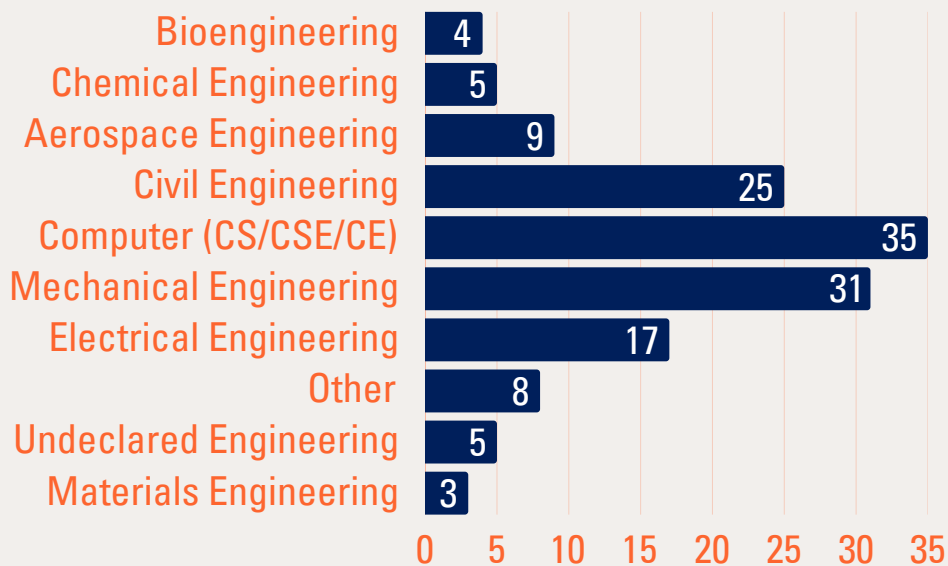

These awards reflect not only the hard work of our members but also the impact of our initiatives on our community and beyond.

- **2022 SHPE Regional and National Chapter Award**
- **2022-2023 Student Group of the Year**, Engineering Society of UCLA
- **Blue Chip Chapter Award** (2024, 2022, 2021, 2020, 2017, 2016, 2015)

SUPPORT AND RESOURCES

Our goal is to create a supportive environment where members can succeed academically through resources, mentorship, and community-driven accountability.

Bi-Quarterly Study Nights

Twice a quarter, during midterm and exam periods, SOLES hosts dedicated study nights. We provide dinner and stress relief activities, creating a welcoming atmosphere where members can work together. This community space promotes accountability and motivation, ensuring that no member has to tackle coursework alone.

Class Planning & Guidance

One of the most daunting tasks is navigating course requirements. We provide workshops and one-on-one guidance on class planning, helping underclassmen and transfer students map out their academic journeys. Upperclassmen share insights on which professors to take, how to best balance course loads, and what electives best align with specific career paths.

Study Material & Textbook Bank

This resource will provide members with access to materials for practice and a library of textbooks. This initiative is an investment in equitable access to education, ensuring all SOLES members have the tools to excel in their classes.

One-on-One Guidance

Study Night

GROWTH & OPPORTUNITIES

We aim to support our members' academic growth by providing opportunities to explore research and connect with mentors in STEM.

Academic Workshops

We host a variety of academic workshops and programs designed to equip our members with skills that go beyond the standard curriculum. These include graduate school prep sessions, graduate student talks, mentorship class planning, and collaborative study nights.

Research Info Sessions

Undergraduate research is a critical component of a competitive STEM education, and SOLES works to bridge the gap between students and faculty by hosting research information sessions. These feature presentations from graduate students who discuss their work and highlight available opportunities in their labs.

Guest Speakers

We enrich our members' perspectives by inviting a diverse range of guest speakers, including alumni, industry professionals, and graduate students, to share their experiences and insights on navigating a career in STEM. These talks provide invaluable networking opportunities and expose our members to the various career paths available to them after graduation.

Matlab Workshop

Workshop with SpaceX

SIGNATURE EVENTS

Our goal is to motivate our local underrepresented students of Los Angeles to pursue a degree in STEM!

Engineers in Training (EIT) Day

Engineers in Training (EIT) Day is our largest and most impactful outreach event of the year, hosted each fall on the UCLA campus. This last fall, we brought approximately **200** students from across Los Angeles to expose them to the vast possibilities within STEM. The day is filled with hands-on workshops, engaging engineering challenges, and inspiring panels where students can interact directly with our members.

Noche de Ciencias

Noche de Ciencias brings STEM to a local high school each winter, inspiring first-generation and underrepresented students through interactive STEM workshops and college readiness presentations. This last winter we hosted about **80 students** at a local high school. Our members lead engaging activities and provide mentorship, helping students see college and STEM careers as achievable goals.

NdC - Hydraulic Bridge Workshop

EIT - Car Workshop

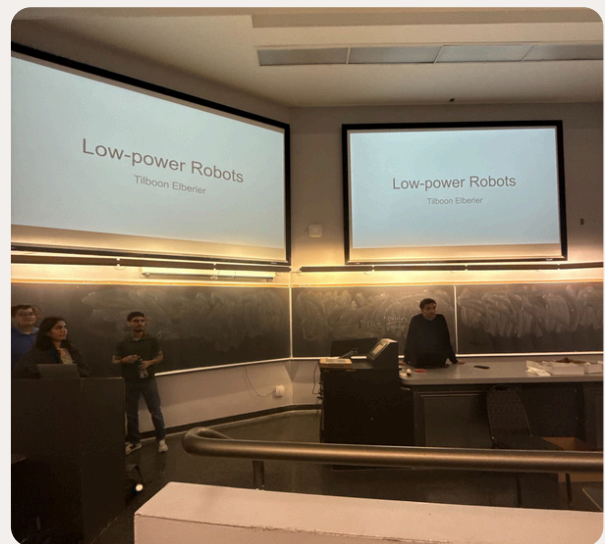

SIGNATURE EVENTS

LeaderSHPE Jr. Retreat

Held in the spring, the LeaderSHPE Jr. Retreat is a critical event for the professional and personal development of high school students. This last spring, we hosted **90 students** from three local high schools for a day focused on enhancing leadership skills and empowering them to pursue higher education. This event provides invaluable networking opportunities with high school, collegiate, and professional SHPE members through interactive competitions, leadership workshops, and hands-on engineering activities, building a strong pipeline of future leaders.

Community College - QnA

Graduate Student Panel

Community College Outreach

Recognizing the vital role community colleges play, we have a dedicated outreach program to support transfer students. Our program is built on three key components designed to help the transfer process: Campus Tours give prospective students a chance to see the campus and imagine themselves here; Transfer Student Panels feature current SOLES members who share their journeys and answer questions; and Technical & Professional Workshops help students prepare for the academic rigor and career opportunities at a four-year university. Together, these initiatives make the transition feel less intimidating and more exciting.

SPECIALIZED EVENTS

Our outreach extends to all ages and communities, planting the seed of possibility early and ensuring families are included in the journey.

Día de Ciencias

Día de Ciencias brings STEM to younger students. Through small, interactive events hosted at local elementary schools, we introduce fundamental engineering concepts through fun, accessible activities. By interacting with college mentors, elementary students begin to see themselves in higher education and STEM fields. These events show students that their curiosity is a superpower and that their questions deserve to be explored, planting the seed for a lifelong love of learning.

Campus Tours

Throughout the year, we also host campus tours for local middle and high school students to expose them to the Bruin community and inspire them to achieve their academic goals. These are more than just walking tours. They are opportunities for students to learn about college life through the personal experiences shared by our SOLES members. By walking the campus and hearing these stories, students can more easily envision themselves as future UCLA students.

High School Tour

Día De Ciencias 24'

SPECIALIZED EVENTS

LeaderSHPE Jr. Chapters

Our commitment to mentorship extends year-round through our partnerships with local Middle School and High School SHPE Jr. Chapters. We regularly provide workshops and panels for these chapters, offering consistent guidance and support. This sustained relationship helps build a strong, continuous pipeline of students who are prepared and motivated to pursue STEM degrees.

SHPE+inas Outreach

As part of a national SHPE initiative, our SHPE+inas program is dedicated to empowering young women and girls in STEM. We plan on hosting targeted outreach events for local schools designed to foster a tight-knit community of future Latina engineers. Through workshops and mentorship, we hope to create a space where girls can share similar stories and experiences, building the confidence and support network they need to thrive.

Equipando Padres

A newer but critically important initiative, Equipando Padres ("Equipping Parents"), aims to educate the families of underrepresented students. We host info sessions and workshops, in both English and Spanish, on college applications, financial aid, and post-high school options. By empowering parents with knowledge and resources, we ensure students have a strong support system at home as they navigate their path to college.

SHPEtine Picnic

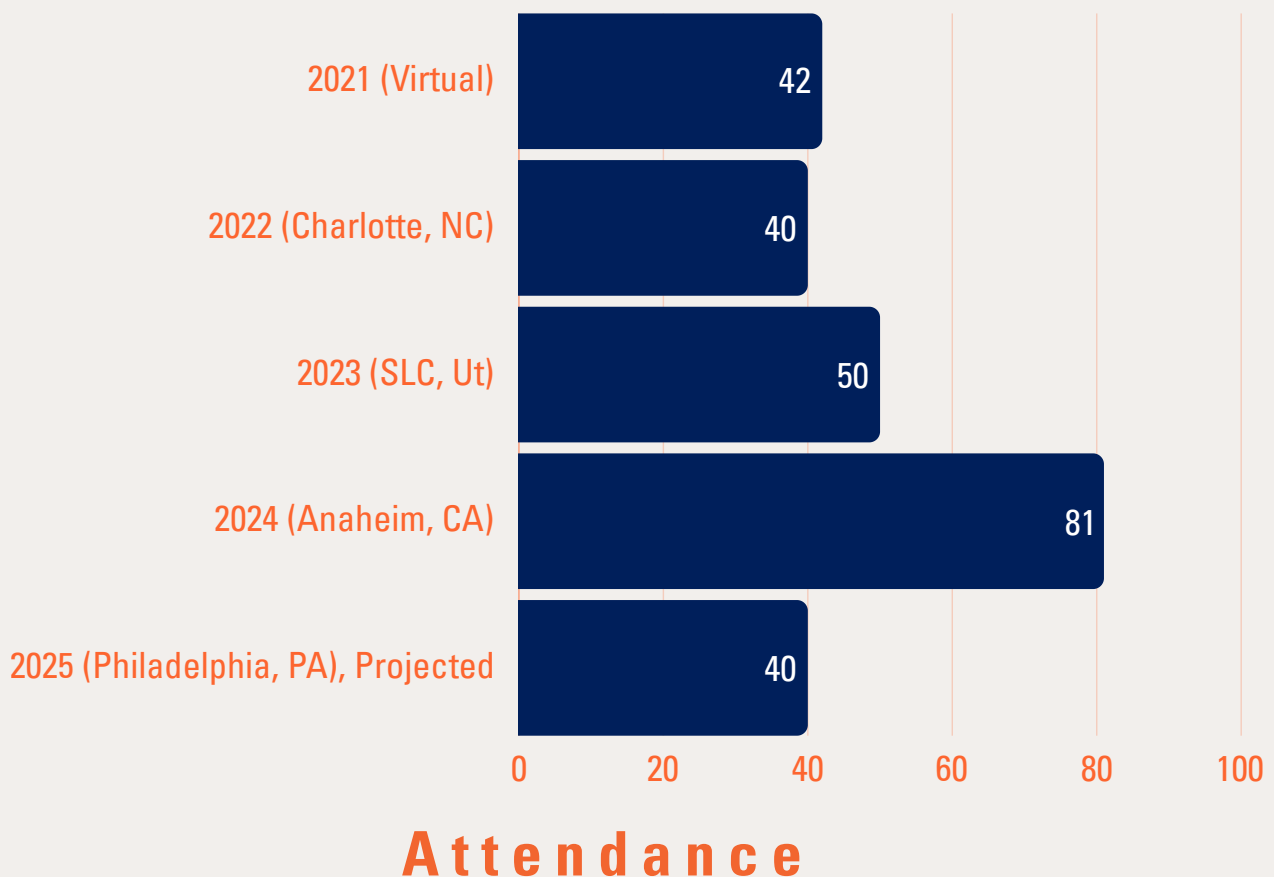

Copa de Sol 2025

SHPE NATIONAL CONFERENCE

Our goal is to set the stage for our members to take space in the industry and demonstrate the power of Latinx talent.

The annual SHPE National Convention is the largest Hispanic engineering conference in the nation and a cornerstone of our professional development pillar. This event provides members with unparalleled opportunities to secure summer internships and full-time jobs, expand their professional network, and connect with thousands of other Hispanic STEM students and professionals from across the country.

Thanks to the generosity of our sponsors, we have consistently been able to send a large delegation of our members to this career-changing event. This year's convention takes place in Philadelphia, Pennsylvania. The cost of attendance poses a significant financial burden to many of our members, so our primary goal is to provide financial assistance to as many attendees as possible to cover registration, travel, and lodging.

TECHNICAL PROJECTS

Our project teams provide members with invaluable, hands-on experience, allowing them to apply classroom theory to real-world challenges and develop tangible, resume-building skills.

SOLES Racing

SOLES Racing offers an interdisciplinary engineering experience where members collaborate to build a hydrogen-powered RC car for the annual H2 Grand Prix competition. Participants gain practical skills in advanced manufacturing, chassis and suspension design, fuel cell integration, and wireless control systems.

SOLES.AI

Our Artificial Intelligence project features two distinct paths to accommodate all skill levels. The Learner Track provides a structured curriculum for mastering AI fundamentals through guided projects. The Project Track allows more experienced members to collaboratively tackle a single, complex problem using different approaches. This prepares our members for impactful careers in the rapidly advancing field of AI.

SOLES WebDev

The web development team gains practical, full-stack experience by building and maintaining our official chapter website. Using industry-standard tools like React, Figma, and MongoDB, members learn the entire development lifecycle, from UI/UX design to back-end implementation. This project delivers a tangible, impactful product that members can showcase in their portfolios and discuss in interviews.

SOLES.AI Work Meeting

SHPE Nationals 25'

WORKSHOPS

We are committed to providing our members with the technical skills and valuable connections needed to excel in their careers.

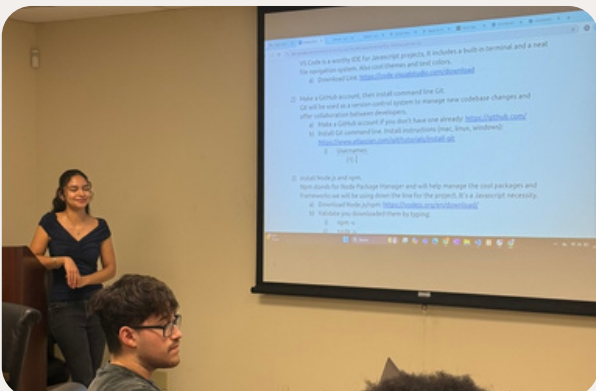

Technical Workshops

Throughout the year, we host a variety of workshops that provide hands-on training with the industry-standard tools needed to succeed in STEM. These sessions are often led by experienced upperclassmen or industry professionals, ensuring the content is relevant and practical. Some workshops include:

- **Technical Interview Prep (Leetcode):** Guides members through common coding problems to teach key problem-solving techniques.
- **Engineering Design (AutoCAD):** Provides hands-on experience in CAD software used across different engineering disciplines.
- **Data Analysis & Modeling (Matlab):** Introduces a powerful tool for data analysis, simulation, and modeling.

Professional Workshops

We emphasize the development of professional skills. We host workshops on resume building, mock interviews, and effective networking strategies. In advance of major career fairs like the SHPE National Convention, we hold multiple sessions to equip our members with the confidence and preparation needed to succeed, from perfecting their elevator pitch to navigating conversations with recruiters.

Technical Workshop

Soles Racing Work Meeting

PROFESSIONAL GROWTH

We provide a structured pathway for our members to develop into strong candidates, future leaders, and connected alumni.

Our Career Pipeline

This pipeline is designed to guide members through the recruiting process and develop them into strong, competitive candidates. It includes student-led workshops, one-on-one mentorship with successful upperclassmen, access to a curated internship bank with over 500 applications, and mock interviews to build confidence.

The InternSHPE Program

This is our most effective pathway for developing the next generation of SOLES leaders. The program cultivates leadership by placing interns directly with our executive board members, providing them with direct mentorship and firsthand experience in chapter management. **11/13** of our current board members are “graduates” of this leadership pipeline.

Conexiones al Sol

Conexiones al Sol, a new event started last year, is dedicated to connecting our current members with SOLES alumni. The goal is to provide opportunities for students to gain career insights and other opportunities, and for alumni to give back. Following a successful debut, we are establishing this as an annual event to continue strengthening our SOLES familia for years to come.

Members of the Quarter

Company Event

OUR COMMUNITY

Our goal is to create a safe, inclusive space for connection to support Latinx STEM representation within UCLA's community!

Recruitment & Welcoming Events

Our recruitment efforts are focused on being a visible and welcoming presence for new and prospective students. We are active at major campus events like UCLA Bruin Day, the Latinx Welcome, and the Enormous Activities Fair. A cornerstone of this effort is our First-Year Admit Weekend, where admitted students are hosted by our members, giving them an authentic preview of life as a UCLA Engineering student and a member of the SOLES familia. We kick off each academic year with a large social event, like our Tri-Org Beach Day, to build community from day one.

The MentorSHPE Program

Navigating college life is difficult, but our MentorSHPE program ensures no member does it alone. We pair underclassmen with upperclassmen in "familias" to provide guidance on everything from choosing classes to balancing academics and socializing. This program is the heart of our retention strategy, fostering strong 1-on-1 relationships that create a supportive and personal community network. Through engaging activities like pumpkin carving, holiday gift exchanges, and friendly competitions, these familias build the bonds that make SOLES a home away from home.

Engineering Welcoming Day

MentorSHPE Ice Skating

ACTIVE FAMILIA

We are also dedicated to keeping our members engaged through a vibrant social calendar and initiatives that ensure every member feels a sense of belonging.

Active Community

We believe that strong bonds are built through shared experiences. Our MemberSHPE program organizes a wide range of social events, including intramural (IM) sports teams, ice skating trips, beach days, and fundraisers. We also focus on Building RelationSHPEs with other SHPE chapters in our region through events like the annual UCLA x USC Tailgate, the SHPE Region 2 Carne Asada, and the Copa del Sol soccer tournament, expanding our members' networks beyond UCLA.

Inclusivity

We are committed to fostering a welcoming environment for every member of our community. Our **SHPEtinias Initiative** creates a tight-knit community for our Latina engineers to share experiences and support one another through picnics, study outings, and dedicated networking events. Similarly, our **Transfer Representative** ensures our transfer student community feels at home by organizing transfer-specific socials, movie nights, and dinner dates, helping them build connections with peers who understand the unique transfer experience.

Celebrating Our Members

Our members are the reason for our success, and we make it a priority to recognize their growth and achievements. We celebrate them through our **Member of the Quarter** highlights and our annual **SHPE's Giving event**, a time for our familia to come together like a family. The year culminates in the **Tri-Org Banquet**, an end-of-year celebration where we honor our graduating seniors, recognize outstanding members, and welcome the incoming executive board.

SPONSORSHIP OPTIONS

As a sponsor of SOLES, you have the freedom of choosing which options will benefit your company the most. Treat the suns like currency to put together your own personalized package!

Below are some things you can buy using the suns. If you require different options, please contact us to discuss further.

How to Give

You may donate or sponsor us online by credit card or PayPal using the online giving link below.

- **Online Giving Link:**
<https://giving.ucla.edu/campaign/donate.aspx?Fund=18400c&Code=M-44527>
- **UCLA Foundation Fund Number:** 18400c
- **Marketing Effort ID:** M-44527

The UCLA Foundation also accepts donations in the form of checks. Please make checks payable to "**The UCLA Foundation**" and include the following details in the memo line: **Society of Latinx Engineers and Scientists (SOLES) at UCLA, Fund 18400c, m-44527**

Checks may be sent to the mailing address below:

The UCLA Foundation
PO Box 7145 Pasadena,
CA 91109-7145

More Info On Giving

Your donation will be disbursed by the UCLA Foundation, which receives contributions made by alumni, friends, private foundations, and corporations on behalf of UCLA's departments and clubs.

- More information about the management of funds can be found here: <https://mygiving.ucla.edu/faq#disclosure>
- Additional documents you may need can be located here: <https://mygiving.ucla.edu/faq>.

Since we hold 501(c)(3) status, donations made to us are tax deductible.

For donation and UCLA Foundation related inquiries, please contact Elisabeth Leavitt, Corporate and Foundation Relations, UCLA Samueli School of Engineering at ekealy@support.ucla.edu.

Thank you!
